Insurance Broker

Why use Transport Insurance from SCHUNCK GROUP?

Five Real-life Examples

* Shipments for which transport insurance was taken out

Loss	Legal liability of the forwarding agent/carrier *	WorldCover-Plus ** (Transport Insurance)	Examples	Entitlements according to legal liability (HGB/CMR)	Payment under WorldCover-Plus* (Transport Insurance)
Loss resulting from force majeure (lightning strike, hail etc.) or unavoidable event (e.g. robbery)	No liability, therefore no compensation for the contracting party	Full indemnification ***	Computer boards with a value of EUR 100,000 are being transported from Munich to Stuttgart. The consignment weighs 100 kg. Total damage occurs during unloading.	HGB SZR 8.33 x 100 kg = SZR 833 or approx. EUR 1,000	EUR 100,000 Full indemnification
Loss to goods during transportation	Standard liability, e.g. HGB/CMR: SZR 8.33/kg (approx. EUR 10)	Full indemnification ***	Owing to a traffic accident caused by the carrier, goods with a value of EUR 200,000 are delivered to the consignee five hours late. The freight charges for this order are EUR 100. The delayed delivery results in a verifiable production outage for the consignee, who suffers a financial loss amounting to EUR 10,000.	Difference to be borne by the principal: EUR 99.000	
Consequential loss (e.g. production stoppage resulting from loss to goods)	No liability on the part of the forwarding agent or carrier if in law the latter is liable as a forwarding agent	Compensation of up to EUR 500,000 for each loss event according to Consequential Losses Clause based DTV-Güter 2000/2008	A robbery occurs during a stop at a service station in Italy. Care was taken to use a prescribed car park. Armed force was used to compel the driver to hand over goods with a value of EUR 250,000 to the thieves. Subsequent investigations prove unsuccessful.	HGB EUR 100 x 3 = EUR 300	EUR 10,000 Full indemnification
Simple financial loss as a result of exceeding delivery period	HGB: three times the amount of the freight charge CMR: the simple amount	Compensation of up to EUR 500,000 for each loss event according to Pure Financial Losses Clause based on DTV-Güter 2000/2008	During transportation to a country in Eastern Europe a local car driver crosses a red traffic light, causing a collision with a driver working for a German forwarding agent/carrier. The load with a total value of EUR 150,000 also suffers considerable damage.	CMR EUR 0,00	EUR 250,000 Full indemnification
Storage loss	Liability of the forwarding agent only when at fault; limit according to ADSp2017: 8,33 SZR per kg, max. EUR 35,000 per claim	Full compensation up to a maximum of 60 days for each transport contract when interim storage is obligatory for transport reasons. Extended storage periods can be insured after prior agreement	During transport by ferry to England, the ship capsizes and sinks for unexplained reasons. The ferry, all the vehicles it was carrying and their loads are lost.	No compensation for the principal due to no legal liability (unavoidable event)	
				CMR EUR 0,00	Indemnification for actual loss plus any recovery and disposal costs
				Possible liability on the part of a carrier	Full indemnification

Please note:

Transport insurance cover commences as soon as the goods, in execution of the transport contract, are removed from the place that they were being stored. The insurance cover ends at the destination at the place specified by the consignee (place of delivery).

For the purposes of transport insurance “all-risk” cover applies. Upon special request, cover can be extended to include extra items, or the cover form “Restricted cover” may be selected. The provision of transport insurance is effected on conclusion of the transport contract by agreement. Insurance protection and premiums are extremely attractive in this case.

* General Terms and Conditions may contain additional liability restrictions (e.g. ADSp2017)

** Insurance cover is available to the principal through the forwarding agent in cases where the former desires the cover

*** Based on the insured amount reported (definition according to policy terms)
